DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-18 and 51-53, drawn to the display of the advertisements ,
classified in class 705, subclass 14.
- II. Claims 19-50 and 54-56, drawn to composing an e-mail message,
classified in class 345, subclass 752.

2. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as the display of the advertisements while group II can separately be used for enabling a user to send an e-mail message. This separate use patent ably distinguishes the invention of group I from group II since the feature of generating an e-mail message is not a limitation of those other independently claimed inventions. The generating of e-mail message shows that the invention of group II is separately usable from the invention of group I. See MPEP § 806.05(d).

3. Because these inventions are distinct for the reasons given above and the search required for each independently have acquired a separate status in the art as shown by different classification and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for

Art Unit: 3622

examination purpose as indicated is proper.

4. Since the examiner knows from past experience that an election will usually not be made by telephone, this restriction is proper under MPEP 812.01.
